***Pursuant to Fla. Stat. §509.013, public lodging establishment means any unit, group of units, dwelling, building, or group of buildings within a single complex of buildings which is rented to guests more than three times in a calendar year for periods of less than 30 days or 1 calendar month, whichever is less, or which is advertised or held out to the public as a place regularly rented to guests. Included in this definition are vacation rentals.**

A change of occupancy or use of a building may require the owner to make application to the Building Official and obtain the required permit for the new occupancy.

Application is hereby made to obtain a permit to do the work and installations as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work will be performed to meet the standards of all laws regulating construction in this jurisdiction. I understand that a separate permit must be secured for ELECTRICAL WORK, PLUMBING, SIGNS, WELLS, POOLS, FURNACES, BOILERS, HEATERS, TANKS, AIR CONDITIONERS, and etc.

NOTICE: Bay County Builders' Services Division does not have the authority to enforce deed restrictions or covenants on properties. You are advised to check for any restrictions that may affect your property.

For improvements to real property with a construction cost of \$2,500 or more, a certified copy of the Notice of Commencement is required to be submitted to Builders' Services when application is made for a permit or the applicant may submit a copy of the Notice of Commencement along with an Affidavit attesting to its recording. A certified copy of the Notice of Commencement must be provided to Builders' Services and posted on the jobsite before the first inspection can be performed.

The enforcing agency shall require each building permit for the demolition or renovation of an existing structure to contain an asbestos notification statement which indicates the owner's or operator's responsibility to comply with the provisions of Section 469.003, [Florida Statutes](#), and to notify the Department of Environmental Protection of his or her intentions to remove asbestos, when applicable, in accordance with state and federal law.

IMPORTANT: The building permit is valid as long as there is construction progress and an approved inspection is recorded within each 180 days (6 months) period.

Owner/Agent/Contractor Affidavit

I certify that all statements, drawings, and other information submitted on and with this application are true and correct and that all work will be done in compliance with all applicable laws. I further certify that I have reviewed the applicable regulations associated with the proposed construction and intended use. I understand that the submittal of incorrect information or any changes which vary from the approved plans will result in the revocation of this permit.

NOTICE TO SWIMMING POOL OWNERS REGARDING PENALTIES FOR NOT PROVIDING POOL BARRIER

I, (property owner's name) _____,
at (address of pool) _____,

on this date _____, have read and understand this pool barrier notice and understand the penalties for not complying with Florida Law. I have been informed that, prior to filling pool with water, I will need approved inspections and a barrier as required by [515 Florida Statutes](#) and [section R4501.17](#) of the 6th Edition FBC.

The Code requires pools to be protected by a barrier (an approved wall, fence or other substantial structure). The barrier shall completely protect the pool and is intended to prevent unauthorized and/or unsupervised access to the pool. Effective March 1, 2002, jurisdictions cannot approve a final inspection for a pool unless it meets the following pool safety barrier requirements.

NOTE: An effective pool barrier must be provided. **One, or a combination** of the following methods, must be employed to provide the barrier. Please read **all** of the following, as some of the methods inter-relate to each other.

- A swimming pool with an approved safety pool cover complying with ASTM F1346.
- The pool may be isolated from access by a fence type barrier. If so, it shall be at least 4 feet (48") high and installed around the perimeter of the pool. Any openings in the barrier (railing, spacing, etc.) shall be less than 4" (inches). It must be designed to discourage climbing from the outside.
- Access gates, when provided, shall be self-closing and shall comply with the requirements of Sections R4501.17.1.1 through R4501.17.1.7 and shall be equipped with a self-latching locking device located on the pool side of the gate. Where the device release is located no less than 54 inches (1372 mm) from the bottom of the gate, the device release mechanism may be located on either side of the gate and so placed that it cannot be reached by a young child over the top or through any opening or gap from the outside. Gates that provide access to the swimming pool must open outward away from the pool. The gates and barrier shall have no opening greater than 1/2 inch (12.7 mm) within 18 inches (457 mm) of the release mechanism.
- If the wall of the home is part of the required barrier, any doors or windows in that wall must be equipped with an alarm that has a minimum sound pressure rating of 85 decibels at 10 feet and comply with UL 2017. A delay/muting switch, at least 54 inches high, shall be provided for each door with an alarm (except as noted in the next paragraph). Where a wall of a dwelling serves as part of the barrier, **one** of the following shall apply:
 1. All doors and windows providing direct access from the home to the pool shall be equipped with an exit alarm complying with UL 2017 that has a minimum sound pressure rating of 85 dBA at 10 feet (3048 mm). Any deactivation switch shall be located at least 54 inches (1372 mm) above the threshold of the access. Separate alarms are not required for each door or window if sensors wired to a central alarm sound when contact is broken at any opening.

Exceptions:

- a. Screened or protected windows having a bottom sill height of 48 inches (1219 mm) or more measured from the interior finished floor at the pool access level.
 - b. Windows facing the pool on floor above the first story.
 - c. Screened or protected pass-through kitchen windows 42 inches (1067 mm) or higher with a counter beneath.
2. All doors providing direct access from the home to the pool must be equipped with a self-closing, self-latching device with positive mechanical latching/locking installed a minimum of 54 inches (1372 mm) above the threshold, which is approved by the authority having jurisdiction.
 3. A swimming pool alarm that, when placed in a pool, sounds an alarm upon detection of an accidental or unauthorized entrance into the water. Such pool alarm must meet and be independently certified to ASTM Standard F2208, titled "Standard Safety Specification for Residential Pool Alarms," which includes surface motion, pressure, sonar, laser, and infrared alarms. For purposes of this paragraph, the term "swimming pool alarm" does not include any swimming protection alarm device designed for individual use, such as an alarm attached to a child that sounds when the child exceeds a certain distance or becomes submerged in water.
